

App Description:

Outline of the application i.e. who has asked for it and who what is required (project brief).

Application name:

The name you are giving your app

Application type:

What type of application are you creating i.e. desktop / mobile

Application purpose:

What are you hoping to achieve i.e. teach children about healthy living

Target audience:

Who are you aiming the application at i.e. what age group

Resources required:

What resources are you going to use i.e. internet / word / Development Environment etc

Hardware required :

What does the user need in order to run your app (just use a basic computer spec)

Software required:

What type of software will the user need i.e. windows OS

TASK 2 – Design

Insert your structure diagram here.

TASK 3 – Action Plan

Must show high level tasks / sub tasks and milestones for each phase (high level task) Below is an **example** for high level task 'Analysis & Design'. Your sub task names may be different.

Remember SDLC Models – you will probably have the following phases as well: Implementation / Testing / Evaluation

Task	Start Date	End Date	Duration (Days)	Resource
Analysis & Design				
Project Spec				
Structure Diagram				
Milestone Planning Complete
